

Construction and Project Management Services

PDC's comprehensive construction services encompass all phases of planning, design, procurement, construction management, and post construction maintenance. We can provide services from start to finish for any development project, or we can support a particular or specialized phase of a project. PDC's design/build services include support in project start up including planning, construction scheduling, cost analysis, value engineering, permit acquisition, plan approval, and property acquisition.

PDC offers a comprehensive range of construction, and environmental services throughout rural Alaska. Our satisfied clients include the US Air Force, Army Corp of Engineers, US Fish & Wildlife, US Postal Service, US Park Service, various Regional Housing Authorities, Native Village Corporations, and private sector businesses.

Our construction management services include general contracting, assistance with project planning and bidding, construction inspection and quality control testing, specialized procurement, cost monitoring and control, management and oversight for all project phases.

PDC's Construction and Project Management Services Include:

- Comprehensive Project Planning and Construction
- Coordination of Civil, Architectural, Structural and Mechanical Design
- Facility Construction
- General Contracting and Construction Management
- Post Construction Facility Maintenance
